

REOPENING PLAN AND OPERATION OF ACTIVITIES **FOR PREVENTION OF CORONAVIRUS / SARS-COV2 / COVID-19 CONTACTS**

Guidelines, measures, protocols and adaptation processes

Scuba Cancun's main objective is to offer unique underwater experiences in a safe and fun way in Cancun, Riviera Maya and Cozumel. Our commitment to follow quality, safety and service standards are based on guidelines from international organizations such as PADI, DAN, WHO, CDC, as well as those required by the federal, state and local governments.

Given the circumstances surrounding the SARS-CoV-2 virus and in order to provide the diving, snorkeling and deep sea fishing services in a safe way for all, we adhere to the new international provisions by conducting a comprehensive, continuous and current investigation to install new measures and procedures according to new guidelines on how to carry out the general operation with the necessary safety and hygiene for our clients, collaborators and suppliers in order to avoid the risk of contagion and adapt to the Covid-19 era.

The following plan is divided into the following sections:

- 1. General guidelines for clients, staff and suppliers**
- 2. Hygiene and disinfection measures**
- 3. Adaptation protocol**
- 4. Adaptive operational processes**
- 5. Waste management**
- 6. Emergencies**
- 7. Annex**
- 8. Support materials**
- 9. Reference sources**

I.- GENERAL GUIDELINES FOR CUSTOMERS, COLLABORATORS AND SUPPLIERS

Refers to the adaptations that will be carried out for the prevention of infections, especially for those who could be asymptomatic carriers of Covid-19.

These guidelines include:

- ✓ Maintain a social distance of at least one and a half meters between people.
- ✓ Regularly clean surfaces (i.e. desks and tables) and objects (i.e. door handles, handrails, telephones, keyboards, etc.) with suitable disinfectant solutions (see Section 2).
- ✓ Promote regular and exhaustive handwashing by clients, collaborators and suppliers.
- ✓ Place hand sanitizer dispensers in visible and necessary places.

- ✓ Strongly recommend the use of a mask that covers the mouth and nose at all times.
- ✓ If necessary, sneeze into your elbow or on a disposable tissue.
- ✓ Encourage clients, collaborators and suppliers to not touch their faces and avoid touching other surfaces as little as possible.
- ✓ Constant communication of measures and procedures to promote care and health to all.

2.- HYGIENE AND DISINFECTION MEASURES

-) Before, during and after each of the different activities, facilities, surfaces, materials and equipment are cleaned and disinfected using one of 3 types of disinfecting solutions:

Solution 1.-Chlorine water (Sodium hypochlorite) for general disinfection of surfaces such as furniture, bathrooms, tables, etc. (Diluted at 10% for each liter of water).

Solution 2.-Chlorine water (Sodium Hypochlorite) and bleach for surfaces that require stain removal such as bathrooms, floors, boats, transfer units, etc. (Diluted in 10% chlorine, 5% bleach for every liter of water).

Solution 3.- Water with Swipol (Liquid specialized in disinfection of delicate or contact equipment to avoid wear and oxidation, this solution is used for: Diving Equipment (Vests, wetsuits, regulators, suitcases, accessories, etc. (Diluted 2.5% for each liter of water) The manufacturer instructions for equipment care will also be followed.

-) All our boats will be disinfected before and after each departure.
-) Our transportation unit for tours to Caverns and Cozumel will operate under standards of cleaning and disinfection, and will have antibacterial gel and supplies necessary for hygiene and safety.
-) All the equipment provided for our activities will be delivered previously disinfected under strict hygiene controls. Nozzles will be delivered disinfected; however, we will have new ones in case the client wishes.

3.- ADAPTATION PROTOCOL FOR FACILITIES AND EQUIPMENT

Reception:

-) The area is fully disinfected before, during and after each shift.
-) Access to this area is restricted only to the necessary staff.
-) In compliance with the rules of social distancing, the maximum number of people is limited to 2 staff and 2 clients at the same time.
-) The customer service areas are isolated through an acrylic as a protection barrier.
-) There will be signs that indicating the distance limit as well as decreased contact at the counter.
-) All office supplies (telephones, computers, folders, pens, etc.) will be constantly disinfected.
-) The collection and signature procedures will be carried out as quickly as possible. The client will be asked to avoid paying in cash to decrease the handling of coins and bills.
-) Disinfectant gel will be available on the counter.
-) Temperature scans of customers, collaborators and suppliers will be measured with a digital thermometer as a preventive control (See Section 4.1 for information).
-) Reception will constantly recommend travel agencies, clients, staff and the general public remain diligent about these protocols.

Offices:

-) Areas and equipment are cleaned and disinfected before, during and after each shift.
-) Restricted and controlled access.
-) The social distance of 1.5 meters must be maintained at all times.

- J Personnel entering or staying in this area must wear face masks that cover the mouth and nose.
- J Each office has antibacterial gel for constant hand cleaning.
- J All meeting will be held in open areas with social distancing.

Equipment Storage:

- J Facilities, equipment and materials are cleaned and disinfected before, during and after each shift.
- J The Customer Service area on the counter is isolated with acrylic as a preventive measure.
- J There will be a sign on the floor that marks the social distance of 1.5 meters. for row and provision of equipment.
- J Antibacterial hand gel will be available.
- J All equipment for our activities for use by our clients and staff is cleaned and disinfected upon receipt, during maintenance and prior to distribution under the strict controls outlined on page 1 of this document.

Swimming Pool:

- J There is a certified supplier that constantly verifies the chemical composition and quality of the water as well as its adequate maintenance.
- J In order to comply with the rules of social distancing, the maximum capacity is limited to 8 people at the same time.

NOTE: The capacity may increase if there are family or friends living together, after review and authorization.

Boats and Vans:

- J All our boats and vans are cleaned and disinfected before, and after each service with strict controls.
- J All boats and vans have the necessary hygiene and safety supplies
- J All visiting boats that arrive at our dock must go through a review of cleaning and disinfection reports.
- J In order to comply with the rules of social distancing, our vessels are reduced by 30% of their normal capacity.
- J The transfer vehicles for tours to Caverns and Cozumel have been reduced to a maximum of 9 passengers plus driver.

NOTE: The capacity may increase if there are family or friends living together, after review and authorization.

Bathrooms:

- J Review of cleaning and disinfection schedules are under strict control.
- J Each bathroom has the necessary hygiene supplies (toilet paper, soap and drying towels).
- J There will be signs on the floor leading to the bathroom doors indicating the necessary distance of 1.5 meters.

Scuba Snack:

- J There will be signs on the floor indicating the necessary distance of 1.5 meters.
- J The capacity of tables and chairs on the terrace is reduced to avoid crowds.
- J The establishment is responsible for practicing good hygienic measures.
- J The staff uses face masks, hair nets and has antibacterial gel and supplies necessary for cleaning and disinfection.

Compressor Room:

- J All areas are cleaned and disinfected before, during and after each shift.
- J This area has antibacterial gel.
- J There are signs that indicate social distance of 1.5 meters.
- J The operator has all the personal protective equipment (mask, face mask and gloves).
- J VERY IMPORTANT: Tank valves are not touched directly and hands must be washed constantly.
- J The temperatures reached by the compressor (120oC) are well above the SARS-CoV-2 resistance (it inactivates at 60oC), the same as those that occur within the cylinders (up to 182oC) in the process of filling, which eliminates the danger of contamination.

Lockers and Public Areas:

- J Will be washed and disinfected before and after each use with strict control.
- J Stairs, floors, tarpaulin bases, flag poles, and all general areas are cleaned and disinfected before, during, and after each shift with strict control.

4. OPERATIONAL PROCESSES ADAPTED TO CONTAGION PREVENTION***Dives, Courses and Classes*****4.1 Welcome and registration:**

- ✓ The hygiene measures and adaptation protocols for everyone's safety are welcomed and explained.
- ✓ The indicated social distance is maintained in a 1.5 meter flat.
- ✓ Body temperature is taken with an infrared thermometer for preventive control.
- ✓ Customers by temperature $> / = 37.3^{\circ}\text{C}$ or with some other symptom of infection will not be able to carry out activities. Symptoms of COVID-19 are considered: Fever, tiredness or muscle pain, shortness of breath, sore throat, lung infection, headache, loss of taste and diarrhea.
- ✓ Registration is made and the necessary questionnaires are filled out, including the Covid-19 Health Declaration Form (ANNEX)
- ✓ Antibacterial gel is available.
- ✓ We recommend making payments by bank card to avoid the use of cash.

4.2 Delivery of equipment:

- ✓ In the equipment storage, the social distance indicated in a floor of 1.5 meters is maintained.
- ✓ Clients will be reminded to disinfect their hands with antibacterial gel before receiving their equipment.
- ✓ All the necessary equipment for the activities is delivered in a pristine clean and disinfected condition.
- ✓ The nozzles will be delivered disinfected; however, we will have new nozzles in case the client wishes.

4.3 Briefings:

- ✓ Social distance is maintained during briefings on board the boats.
- ✓ The use of face masks will be used at all times.
- ✓ VERY IMPORTANT: In the event that a client wants to wear a visor in addition to a mask, it will be delivered completely clean and disinfected.
- ✓ If a client will dive several days they will disinfect and mark their equipment.
- ✓ If the client so wishes, a special solution will be provided for cleaning their own equipment.

- ✓ During the Buddy Check: it will be avoided to touch the equipment of the other people, in particular the one that is in close contact with the face and the mouth, the clients will be recommended to carry out a visual control of the partner with self-demonstration and verbal confirmation only.
- ✓ Sharing the air / gas in case of emergency (SCUBA diving): Use an alternate air source, suitably disinfected before diving, avoiding donating the regulator with which you are breathing.
- ✓ The staff will promote hygiene measures and adaptation protocols at all times and answer any questions.

4.4. Boarding:

- ✓ The approach should be in a calm way, taking enough time to avoid crowds.
- ✓ There will be signs of social distance indicated on the deck.
- ✓ Each client will only touch their own equipment and in case of requiring support, the staff must disinfect the equipment before returning it to the client.
- ✓ Only people participating in activities will be able to board, at the moment there are no companions allowed.
- ✓ All people must wear face masks while on the boat and in case of coughing or sneezing they will do so in the opposite direction of the wind.
- ✓ At all times the crew will inform customers of the hygiene measures and adaptation protocols.

4.5 On board:

- ✓ Respect the social distance of 1.5 meters. Clients and crew at all times.
- ✓ All of the necessary supplies for safety and hygiene such as antibacterial gel, gloves, mouth covers, etc. will be available.
- ✓ For safety, common cleaning/rinsing water containers are no longer available. Instead cleaning is carried out individually with the ability to rinse equipment with a garden hose.
- ✓ It is not allowed to spit to clean the visors, in exchange a special solution will be granted for its cleaning.
- ✓ In case the client requires support to manipulate his equipment, the instructor or divemaster must disinfect his hands before and after touching the equipment.
- ✓ The exchange of equipment between clients or collaborators is not allowed.
- ✓ Avoid touching anyone on board the boat.

4.6 On the Surface:

- ✓ On the surface, divers are asked to maintain social distance no more than 2 seconds away from the Instructor or Divemasters
- ✓ Divers are asked to continue breathing through their regulators and keep their dive masks on, and if needed to remove them carefully so as not to spit.
- ✓ The staff should not remove or touch the equipment of the clients.
- ✓ The client will be asked not to touch the diving tanks, much less the valve.
- ✓ Each person will be asked not to lend or exchange the assigned equipment, or their own, and not to touch the equipment of others.
- ✓ For customers who snorkel, the tube opening will be asked to point away from other partners.
- ✓ For divers in the water, social distance is not necessary, but those who snorkel must take care of their distance.
- ✓ Back on board everyone must continue with social distancing and put on their mouth/nose covers.
- ✓ They will be asked again to use antibacterial gel at the end of the activity as a preventive measure.

- ✓ If first aid is required, a filter will be used to provide breathing resuscitation, which is given only in case the patient has not entered the water, if he was in the water, then compressions are used directly.

4.7 Landing:

- ✓ It must be gradual and person by person respecting the distance of 1.5 meters.
- ✓ Each client must bring their own equipment back to the warehouse for reception and disinfection after strict control.

5. WASTE MANAGEMENT

-) Ordinary waste management will continue to be carried out in the usual way, respecting waste separation protocols.
-) All personal hygiene materials should be discarded in protected containers with lids.
-) In the event that a worker shows symptoms while at his workplace, the container where he has deposited handkerchiefs or other used products must be isolated. This garbage bag must be removed and placed in a second garbage bag, with closure, for its corresponding disposal.
-) The person in charge of removing the contents of the bins will always do so with personal protective equipment.

6. EMERGENCIES

6.1 On suspicion of Covid-19:

-) The Operating Manager / Luis Figueroa is immediately notified, who has all the resources to act according to protocol.
-) The client is separated or isolated in a ventilated area, is kept at all times with face mask maintaining social distance and water and support are provided to reassure him.
-) If the client improves and makes the decision to leave, he will be recommended to visit a doctor, if he is an agency client, the corresponding report will be made.
-) Monitor arrival of aid or ambulance if required.

6.2 First Aid and CPR

-) Make sure that the rescuer, the victim and those present at the scene are safe.
-) Use all personal protective equipment (PPE) and barriers.
-) Assess consciousness by stimulating the victim, without approaching his face.
-) Assess breathing through observation of chest movements only, avoiding putting the face next to that of the person to help.
-) Call the emergency room if the victim is unconscious and not breathing, and start chest compressions (CPR), without ventilation.
-) Continue rescue efforts until the victim has recovered and breathes normally, or until the rescuer is exhausted or until emergency medical help arrives.
-) After rescue activities are complete, discard the PPE and wash your hands thoroughly.
-) Disinfect the medical devices used on the victim, after use or dispose of by following the appropriate procedures.

7. ANNEX

HEALTH DECLARATION FORM / COVID-19

Read this statement prior to signing it. You must complete this additional medical questionnaire to enrol in a diver training program or to participate in any diving activity. If you are a minor, you must have this statement signed by your parent or guardian.

DIVER MEDICAL QUESTIONNAIRE

The purpose of this medical questionnaire is to ensure that you are medically fit to dive. Please answer the following questions with a YES or NO. If you are not sure, answer YES. A positive response means that there may be a preexisting condition that could affect your safety while diving. If any of these items apply to you, we must request that you consult with a physician, preferably a specialist in diving medicine, prior to participating in diving activities.

Within the 40 days immediately preceding the date of this Health Declaration Form, have you:

1. TESTED POSITIVE OR PRESUMPTIVELY POSITIVE WITH COVID-19 (THE NEW CORONAVIRUS OR- SARS-COV2) OR BEEN IDENTIFIED AS A POTENTIAL CARRIER OF THE CORONAVIRUS?
 YES NO
2. EXPERIENCED ANY SYMPTOMS COMMONLY ASSOCIATED WITH COVID-19 (FEVER; COUGH; FATIGUE OR MUSCLE PAIN; DIFFICULTY BREATHING; SORE THROAT; LUNG INFECTIONS; HEADACHE; LOSS OF TASTE; OR DIARRHEA)?
 YES NO
3. BEEN IN ANY LOCATION/SITE DECLARED AS HAZARDOUS WITH AND/OR POTENTIALLY INFECTIVE WITH THE NEW CORONAVIRUS BY A RECOGNISED HEALTH OR REGULATORY AUTHORITY?
 YES NO
4. BEEN IN DIRECT CONTACT WITH OR IN THE IMMEDIATE VICINITY OF ANY PERSON WHO TESTED POSITIVE WITH THE NEW CORONAVIRUS OR WHO WAS DIAGNOSED AS POSSIBLY BEING INFECTED BY THE NEW CORONAVIRUS?
 YES NO

The information I have provided about my medical history is accurate to the best of my knowledge. I agree to accept responsibility for any omissions in disclosing my existing or past health conditions.

I also commit to inform instructor / dive centre name about any symptom that may arrive after having filled in this declaration and/or having come into contact with someone who has tested positive after signing the declaration.

ADDITIONAL DECLARATIONS / COVID-19

- I WILL, if asked, wear a protective mask at all times while participating in the diving training / activities arranged by instructor / dive centre name, and will take all reasonable preventive steps that may be recommended by instructor / dive centre name, or any relevant public authority.
- I WILL accept and observe all instructions by instructor / dive centre name intended to abide by all existing regulations, required to help prevent the risk of transmission, including having my temperature taken prior to participating in any diving activities.
- I ACKNOWLEDGE and ACCEPT that this declaration will be considered as my consent to instructor / dive centre name retain this declaration and disclose it to any relevant authority or service provider for the purposes of ensuring the safety of any third parties that may come in contact with me prior to, during, and after any diving activity.

PLEASE NOTE

COVID-19 shares many of the same symptoms as other serious viral pneumonias that require a period of convalescence before returning to full activities – a process that can take weeks or months depending on symptom severity (1).

MEDICAL RECOMMENDATIONS (2, 3):

- Divers who have tested positive with COVID-19 but have remained completely asymptomatic, should wait ONE month before resuming diving.
- Divers who have had symptomatic COVID-19, should wait at least THREE months before applying for fit-to-dive clearance conducted by a diving medicine specialist.
- Divers who have been hospitalised with or because of pulmonary symptoms in relation to COVID-19, should wait at least THREE months before applying for fit-to-dive clearance conducted or coordinated by a diving medicine specialist, with complete pulmonary function testing (at least FVC, FEV1, PEF25-50-75, RV and FEV1/FVC, and an exercise test with peripheral oxygen saturation measurement) as well as a high resolution CT scanning of the lungs.
- Divers who have been hospitalised with or because of cardiac problems in relation to COVID-19, should wait at least THREE months before applying for fit-to-dive clearance conducted or coordinated by a diving medicine specialist with cardiac evaluation, including echocardiography and exercise test (exercise electrocardiography).

GENERAL RECOMMENDATION

- Divers and dive centers should observe strictly the guidelines for disinfection of diving gear (as issued by the diving federations and DAN Europe / Divers Alert Network).

The present is a sample of a Health Declaration Form that a dive centre or dive professional may want to adopt and submit to customers and students, before taking up any diving activity with them.

The Form has been developed by the DAN Europe Medical Division team, based on information available as of May 2020. The epidemiological situation is constantly evolving. As a result, this document may be subject to changes and updates.

Eight Simple COVID-19 Risk Reduction Steps for Divers

COVID-19 primarily spreads by inhaling small droplets exhaled by an infected person (respiratory transmission), and by touching the eyes, nose and/or mouth after touching something an infected person touched or sneezed/coughed on (contact transmission). By staying aware of both, risk-reduction is usually straightforward. Keeping things simple usually works well.

- 1. Don't go diving if you have or may have (symptoms), or have been exposed to any infectious disease. Isolate until healthy and clear according to medical advice.**
- 2. Support the space program.** On the surface and out of the water, apply social distancing and give each other the local minimum required separation.
- 3. Keep your dirty mitts off!** Sanitize/wash your hands before and after touching any dive gear (including your own), even if touching was in/underwater. Don't touch someone else's gear unless absolutely necessary. It's not clear that immersion reduces COVID-19 contact risk, so assume that it doesn't. Note: Recommended hand sanitizers are 60%+ alcohol and highly flammable. Do not use hand sanitizer near oxygen nor a fire source. Be sure hands are fully dried before using either.
- 4. Don't clam up: Medical mask etiquette.** My mask helps protect you. Your mask helps protect me. Let's follow local protocols and not be shellfish.
- 5. COVID-19 hates scuba.** Your mask reduces eyes and nose contact-risk, and keeping it on is the best habit whenever you're in the water anyway. Breathing from a regulator reduces your respiration transmission risk.
- 6. Be a lean, clean, sanitary machine.** Use defog. Disinfect masks, snorkels, regulators and BCDs before another person uses them, and before storing them. Don't sling the . . . stuff . . . out of your mask after a dive. Rinse it somewhere appropriately. Avoid spitting/blowing nose etc. into the water where others will be/are. Use tissues and discard them appropriately. Wash/sanitize your hands after touching high contact surfaces like railings, door pulls, safety handles, etc.
- 7. Sharing air is bad.** At the surface. Diving, dive gear and wind affect the direction and distance our exhalations travel. Stay aware and avoid being on, and having someone on, the "receiving end" when clearing snorkels, breathing hard after freediving, etc. Regulator-breathing helps protect you, but your exhalations might affect someone who's too close and not using a regulator.
- 8. But sharing air might be really important underwater.** So, don't test breathe your alternate second stage. Test purge it during checks, but leave it disinfected in case someone needs it. Or, test breathe it, then redisinfect it.

PADI[®]

Seek Adventure. Save the Ocean.[™]

Wash your hands frequently with soap and water

Hands wash technique

When should we wash our hands?

After

Sneezing, coughing, or using disposable paper towel | Handling trash or dirty objects | Traveling by public transport | Being in contact with animals

Symptoms of Coronavirus (COVID-19)

Know the symptoms of COVID-19, which can include the following:

Symptoms can range from mild to severe illness, and appear 2-14 days after you are exposed to the virus that causes COVID-19.

***Seek medical care immediately if someone has emergency warning signs of COVID-19.**

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

This list is not all possible symptoms. Please call your medical provider for any other symptoms that are severe or concerning to you.
